

INFRASTRUCTURE UPGRADES AT THE UEL HERITAGE CENTRE & PARK

The Ontario Ministry of Environment has demanded that we do a major upgrade to our current septic system in the park before we open in 2026. In order to make it environmentally compliant, we need to install a new septic bed, holding tanks and MicroFast sewage treatment tanks.

As our current electrical grid is at maximum capacity for the park, in order to construct the new septic system we also need to upgrade our Hydro Service from Single Phase to Three Phase. This will allow us to have a state-of-the-art septic system, as well as sufficient power to expand the camping, which will bring in added revenue. The costs of upgrades to both the septic and electrical infrastructures is well into the six figures, and way above our normal operating expenses. We are obtaining a loan for some of the costs through our bank, but any assistance is welcome. As a result, we are reaching out to our members, UEL Branches and others to make donations to help with the costs.

Your gift will help to preserve and support our Loyalist History. **All donations will be issued with a charitable receipt.** You can pay by cheque by completing the bottom portion and mailing in, or you can pay by **DIRECT DEPOSIT** online anytime by transfer sent to 1784@uel.ca along with your name and address, and you will receive an immediate confirmation.

Should you wish further information on the UELHCP please contact us at 1784@uel.ca. Thank you for your support!

YES! I would like to support the Upgrades at the UEL Heritage Centre & Park

NAME: _____

ADDRESS: _____

Please make cheques payable to **UEL Heritage Centre and Park** and mail to:

UEL Heritage Centre & Park, 54 Adolphustown Park Road, Bath, Ontario K0H 1G0

Tax receipt will be issued. Registered Charity No 889 242 863 Rr0001
